ESTABLISHED 1836

MRS. MARY B. EDDY DIES OF PNEUMONIA

At Her Home On Bacon Street In
The City Of Boston

Founder of Chris-
tian Science.

ILL ONLY A FEW DAYS

Death Announcement Delayed
Twelve Hours.

SECRECY PREVAILS HOME

Reporters Hector Press Agent
Farlow For Particulars of
Death Bed Scene—Funeral At-
tendance to Be Restricted.

Boston, Dec. 5.—In her splendid mansion on Beacon street, in the Chestnut Hill section of the city of Newton, Mrs. Mary Baker Eddy, 89, who always insisted upon being called the discoverer and founder of Christian Science, breathed her last, death being due to an attack of pneumonia, from which the aged woman suffered about a week or 10 days, in the opinion of Medical Examiner George L. West of Newton Center, who was called and viewed the body.

Alfred Farlow, chief press agent for the church of which Mrs. Eddy was the head, said that it was simply a case of old age, but after being hectoring by the reporters he gave out what the medical examiner had put upon the death certificate. These words were: "Natural causes. The contributory cause being probably pneumonia."

For more than a week Mrs. Eddy had been ailing, or as a Christian Scientist would put it, "had been in error." Still she was up and about, taking her daily drives up to Friday, when she took to her bed and did not leave it again.

She failed steadily, but no practicing physician was called in, the members of her household, most of whom are Christian Science healers, giving her the regular treatment, and Mr. Farlow said that Mrs. Eddy brought all her powers to bear in an effort to heal herself of the "error."

End Was Peaceful.

The end was a peaceful one, according to the press agent, who said that Mrs. Eddy retained all her faculties up to the last moment. He was unable to say if the leader had carried on any conversation with those about her shortly prior to her demise. It had never occurred to him to ask the members of the household what her last words were, but he promised to do his utmost to find out and said he would let the newspaper men know later. He evidently failed to secure permission from the high authorities of the church to give out any details concerning Mrs. Eddy's last hours or moments, for when he met the reporters the only thing he had for them was the words upon the death certificate.

The same mystery which has enshrouded Mrs. Eddy for years was thrown about her end. The undertaker was not allowed to say a word except through Mr. Farlow. Scarcely anything could be had as to her last illness and the news of Mrs. Eddy's death was withheld from the public, even from the worshippers at her church, until 12 hours after it had occurred.

In the last hour, and the announcement of the death, the church leaders were extremely busy, what about no one could find out. Mr. Farlow and Archibald McClellan, publisher of the Christian Science newspapers

Dr. Theron Akin Spent Five Cents
For Lemon and Goes to Congress

"Doc" Akin is a good soul. He is honest—so honest that he has won a unique reputation for giving the most detailed report of campaign expenses that ever elected a man to congress. Theron Akin will represent the Twenty-fifth New York district in congress. His home is in Akin, N. Y., near Amsterdam. When he finds a railroad official that does not give good service Dr. Akin has been in the habit of lambasting the official over the head. At times he wants to swear at conditions, so he asked permission of his church one day to be permitted to say "damn." He likes to chew tobacco, and all he wants is a quiet corner in congress where he can chew tobacco and help pass wise laws. He says he will not get "fussy." Dr. Akin was opposed by the bosses for election, but the people love him for his honesty and quaint ways, and they gave him a handsome majority. He swore that he spent 5 cents for a lemon, 25 cents for a dinner pail and \$135 for two yards of garden hose that he might wash his buggy so the voters would think he knew how to keep a clean vehicle. Dr. Akin objects to being called the lemon congressman. He promises he will not be a lemon to his followers, but when he gave the item of 5 cents for a lemon, "used to help clear my voice so I could make a speech," he sealed his own fate.

entered another phase of existence, where she will continue her individual work, and she is still in a position to progress.

At the time of the equity proceedings instituted by her son, George W. Mrs. Eddy in her will had left all her property to the church. Her property is now and has been for some time in the hands of trustees, at the head of which is Archibald McClellan.

The surrender of Cornwallis at Yorktown was still a memory in the minds of men who were far from old when Mary A. Morse Baker, the future leader of the Christian Science church, was born on July 16, 1821, in a farmhouse, small but comfortable, which still stands on a hill at Bow, N. H. Mary, the youngest of six children, was raised on the upland farm, from which one may see a beautiful stretch of valley, and there she grew to be a very delicate and religious little farm girl. But in her own time she also grew to be, as someone wrote not long ago, "one of the richest women in America—more than that, the most powerful American woman."

There came a time, it was in 1875, that about a dozen disciples of a woman named Mrs. Mary Baker Glover, the head of an idea that had to do with the teaching of a mental healing of physical illness, met at Lynn, Mass., to organize by resolution the first Christian Science association. The dozen pledged to support the movement—and Mrs. Glover—by contributing \$10 a week.

Thirty-one years later, in June, 1906, from all over the world came Christian Scientists to dedicate in Boston the most pretentious religious edifice in New England and one of the most costly in the United States, the "mother church" at Boston.

Grew From Small Beginning.

Out of that little meeting at Lynn has grown an institution which statistics of last year show that in the United States there were 668 Christian Science churches and also Italy, France, Great Britain, Canada and British Columbia, Germany, Norway, Switzerland, India, China, South Africa, Australia and many other countries. Also in the United States were 1,336 Christian Science ministers and 85,096 communicants. All these churches and the churches in foreign countries are the result of the thinking of the delicate, religious little farm girl, and all are branches of the mother church at Boston.

This great growth has resulted in spite of the attitude of the world, an attitude that perhaps may best be illustrated by a "joke" in one of the New York evening papers. The item

TAFT DETERMINES TO
NAME A DEMOCRAT

Supreme Court to Get Associate
Justice From West.

Washington, Dec. 5.—To callers President Taft has indicated his intention of appointing a Democrat to one of the vacancies on the supreme bench. As the situation stands, Frederick W. Lehmann of St. Louis may be named as one of the associate justices. The president has announced his intention of appointing Mr. Lehmann solicitor general to succeed the late Lloyd W. Bowers, but the appointment has not yet been made and the president has continued to talk favorably of Mr. Lehmann's chances for the supreme bench.

Mr. Taft was pleased to find that the suggestion of Mr. Lehmann for the bench met with approval of progressive Republicans and many Democrats. In politics Mr. Lehmann is classed as a Democrat. He lives in the Eighth judicial district, to which the president has expressed his desire to go for one of the associate justices.

President Taft will look to the east for the other associate justice, and it is understood that he has turned his attention from New Jersey and is looking over available material in Pennsylvania. The names of Judges Gummere and Swayne of New Jersey, once prominently mentioned, are now declared to be practically eliminated.

Two names of Pennsylvania jurists are much discussed as possibilities—Judge Joseph Buffington of Pittsburgh and Judge James S. Young, United States district judge for the western district of Pennsylvania.

AS YOU LIKE IT

Rolena G. Garros, French aviator, broke his nose by an 80-foot fall at Memphis, Tenn.

Two Italian army officers were killed while attempting to make an aeroplane flight.

At Pittsburg Anna Kruger, fined for petty larceny, stabbed Detective Homer Crooks in the hand with a hatpin.

Francis P. Burr, captain of the Harvard football team in 1908, died in the Des Brisay hospital, Cambridge, of typhoid fever.

Reynoldsville, Pa., Dec. 5.—Robert and Charles Ferris, 9 and 5, were burned to death, and their parents, Mr. and Mrs. Caesar Ferris, probably fatally injured, and the only other members of the family, Maud, 11, and a baby, were badly hurt in a fire which destroyed the Ferris home.

Echo of Chadwick Operations.

Oberlin, O., Dec. 5.—The trail of poverty-stricken bank depositors left by the late Cassie Chadwick, who died in the Ohio penitentiary a few years ago, claimed its fifth victim when Mrs. Louis Marshall, 67, went to the Massillon state hospital. The loss of her fortune in the wrecking of the Citizens' National bank here was responsible, the doctors told Judge Hinman, for Mrs. Marshall's condition.

CINCINNATI—Wheat: No. 2 red, 95¢; No. 2, 88¢; No. 2 mixed, 83¢@84¢. Corn: No. 2 mixed, 23¢@23 1/2¢. Rye: No. 2, 88¢. Oats: No. 2, 21¢. Bulk Meats—\$1 67 1/2. Bacon—\$11 75. Cattle—\$2 50@3 75. Sheep—\$1 75@2 45. Lambs—\$2 75@3 15. Hogs—\$5 00@7 50.

TOLEDO—Wheat, 95¢; corn, 49¢; oats, 26¢; rye, 31 1/2¢; cloverseed, \$9 00.

MEYER FAVORS NAVY AIRSHIPS

Secretary Wants \$25,000 Appropria-
tion For Experiments

Successful Flight Of Eugene Ely From Deck Of Battleship
Is Described In Detail—Recommends Building Of
Two New Battleships, Saying It Is Cheaper Than
To Repair Old Hulks—Call Attention To Economies
Of His Administration

Washington, Dec. 5.—In his annual report for the fiscal year 1910, Secretary of the Navy George Von L. Meyer recommends the use of airships by the navy and states that platforms can conveniently be built on the decks of battleships from which aerial craft can be started and on which they can alight.

After describing the successful flight of Eugene Ely Nov. 14 from the deck of the United States cruiser Birmingham in Hampton Roads to a point on the Virginia shore Secretary Meyer says:

"This experiment demonstrated the conditions governing the location of future platforms on ships for this purpose and showed that they could be installed without interfering seriously with other features of the ship. Landing on or near a ship on returning with information after a scouting trip appears to be practicable. This experiment and the advances which have been made in aviation seem to demonstrate that it is destined to perform some part in the naval warfare of the future. It appears likely that this will be limited to scouting. A scout which is not strong enough to pierce the enemy's line can get as near as possible and then send an aeroplane thirty or forty miles, obtain valuable information and then return to the scout."

Will Experiment Further.

"The department contemplates further experiments along these lines with the belief that it will be necessary in the near future to equip all scouts with one or more aeroplanes to increase the distance at which information can be secured."

For the purpose of carrying on such experiments the department recommends that \$25,000 be authorized. Mr. Meyer advocates the abandonment of several naval stations both in this country and among some of our insular possessions on the ground in some instances that the channel approaches are inadequate. He describes in detail the improved business methods and organization in the department and states that a great saving will result to the government thereby; also a coincident increase in efficiency.

The secretary also states:

"The estimates submitted for public works at navy yards and stations amounted to \$28,621,530.37, and the amount approved and sent in by me was \$8,135,827."

Saved Over Four Millions.

"The navy department's estimates for the expense of the naval estab-

lishment for the next fiscal year show a saving of about \$4,300,000 as compared with the amounts appropriated last year.

"Competition in the fleet has been encouraged and has resulted in increased efficiency in target practice, economy in coal consumption and economy in consumption of supplies."

"A new organization of the torpedo vessels of the navy, including submarines, has been put into effect with marked benefit to the service. This groups all such vessels in commission in the Atlantic into the Atlantic torpedo fleet, under the command of a single officer, experienced in this class of work. The Pacific and Asiatic torpedo fleets have been similarly constituted in those waters."

"The department has effected a reorganization of the Atlantic fleet with a view to increasing the efficiency of the fleet, promoting economy in repairs and so regulating the repair periods that the amount of work at the several navy yards will be practically uniform throughout the year."

Engineering Competitions.

"The inauguration of the steaming competitions awakened a lively interest in engineering matters throughout the service. This interest has brought about increased efficiency and economy of expenditure. During the fiscal year ending June 30, 1910, the horsepower of the machinery of the fleet has been increased 16 per cent and the average cruising speed has been increased about 16 per cent, yet the total cost of fuel used on vessels of the navy decreased over \$2,000,000."

Increase of the Navy.

"The department recommends the authorization of the following additions to the naval establishment for the coming fiscal year: Two battleships, one collier, one gunboat, one river gunboat, two seagoing tugs, two submarines and one submarine tender. The department invites attention to the fact that it is more economical to build new vessels than to continually repair those which have outlived their usefulness. The department therefore recommends the construction of gunboats each year until existing vessels of that class are replaced."

Bo's Affected.

"Whenever she gets to thinking how much they're in debt it affects her nerves."

"Huh! The way it affects her husband is singular."

"How singular?"

"Just singular; it affects his 'nerves.' He tried to borrow a hundred from me today."—Catholic Standard and Times.

Overwhelmed by Typhoon.

Manila, Dec. 5.—A great typhoon has overwhelmed Zamboanga. Twenty natives were killed and great damage was done. The larger part of the wharves were destroyed. The custom house was wrecked and scores of other buildings submerged and razed. The property loss will exceed \$500,000.
